The

The first day after every of the Feasts, set downe for every Tearme, the Court of the Arches is kept in the forenoone in Bow-Church: and the Admirall Court the same day in the afternoone in Southwarke. The second day after every of the said Feasts, the Audience Court is kept in the forenoon in the Consistory in Paules, and the Prærogative in the same place in the afternoone. The third day following every of the said feasts, the Bishop of London his Consistorie Court is holden in Paules, in the forenoone, and his Maiesties Court of Delegates in the same place afternoone. The fourth day following the said Feasts, his Maiesties Court of High Commission, is kept in the Consistory in Paules, or as of late years at Lambeth, or in the Lord Bishop of London his Pallace on Thursday in the afternoone. But if any of the dayes before recited be Sunday or an Holiday, then is such Court kept the day following. In Hilarie Tearme, some of the abouenamed Court dayes, be ordinarily kept, and as many in Easter Tearme, and Trinitie: according to the course of the yeare, as the Iudge in the Arches in his discretion shall think good, who at the end of every Tearme appointeth the Court dayes to be kept in the next Tearme. But in Michaelmas Tearme, the Court dayes for the same before set downe (if as in the rest, of late dayes they be not altered) were wont certainly to be kept.

I therefore aduise all Country men (especially those that dwell farre off) being cited by any originall processe to appeare in the Arches, Audience, Prærogatiue, or Delegates, to send to some Proctor a note of the case, and to what Court they be cited, to appeare for them, and to returne them word of the very day, in which it shall be needfull for them to appeare in person. But in the course of practise in the High Commission, and the Admirall Court it is otherwise. For every person cited to those Courts, must appeare personally.

The Termes, with the Act, or Commencement dayes, in both the Vniuersities.

HIllary Terme beginneth in both, Ianuary the 13. and endeth at Oxford, the 2. of Aprill. At Cambridge, the 6. of Aprill.

Trinity Terme begins at Oxford, Iune the 8. and ends the 9. of Iuly, but may bee prorogued, *ad Magistrorum beneplacitum.*

Michaelmas Terme in both, begins October the 10. and ends December the 16.

The Act or Commencement of Bachilors in both, is the first day of Lent, February 23.

The Act of Doctors, and Masters in Oxford, is the 9. of Iuly. In Cambridge, Iuly the 4.

Generall Obſeruations, and profitable to be regarded.

GRaft, and plant Trees, the Moone being new, and in Taurus, Virgo, or Capricornus, the wind South, or Weſt.

Remoue, and ſet young Trees, from October vntill March, in the firſt quarter of the Moone, the winde at South, or Weſt, and the weather warme and dry.

Cut Vines in Ianuary, or February.

Fell great Timber, in December, and Ianuary, in the laſt quarter of the Moone is beſt: but if you would haue it to grow againe, cut it downe in the new of the Moone.

Cut hedges, betweene the Change of the Moon, and the Full, from the end of Ianuary, vntill May.

Sheare Sheepe, cut haires, and ſow all manner of Corne in the increaſe of the Moone.

Set and ſow all kind of Seeds, the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricorn, Aquarius, or Piſces, but the ſeeds whoſe rootes be round, ſhould be ſowen, or ſet, 3. or foure dayes, before, or after the full of the Moone.

Dung Land, that weeds may not abound, in the last quarter of the Moone.

Geld or lib Cattell, the Moone in Aries, Libra, or Sagitarius, before the full of the Moone; you may let them blood at any time, the Signe not being in the Heart, nor in the place where the incision is made, nor in the day of the Change of the Moone.

Gather Fruit, Hearbes, and Flowers to keepe, after that the Moone is at the full.

Of all fruits (for the most part) Cheries be soonest ripe, but not all at one instant. The reddest be alwayes the ripest, and must be gathered by the stalkes, and handled as little as may be. Lay them as thin as you can, left by taking heat, they soone lose the glozy of their colour.

Plums, when no part of the fruit cleaues to the stone, be perfectly ripe. If you gather them before they fall downe of themselues, they may be kept long, being spread thin vpon Nettles, or Vine-leaues.

Peares, must be gathered when they haue their full growth which is, when the kernels lye hollow in the coze, and are blacke on the end: to haue them last the longer, lay them one by another vpon a bozded flooze, or flake, made of wande, without straw or fearne.

Apples, being dry gathered, and in the old of the Moone will be best kept, if euery sozt be layd by it selfe (without any fallings among them) vpon bare bozds, or on a plaister flooze, till St. Andrews tide, the thinner they lye the better: let the place be shut close in Frosty and extreame weather, and not farre from fire, in faire weather the ayze must be let in, but in the day time for feare of Mouldinesse. In frost to couer them thicke ouer, with fine Hay, or barly chaffe, will not be amisse.

Wardens, will last longest, being gathered in the Last quarter of the Moone, and layd on dry bozds, without any couering.

Gene-

Generall Rules of Physicke.

CAt no Meyne, nor let Blood, when the Moone is in the place where the incision is to be made, neither when the Sun or Moone are afflicted with the malignant Planets, Saturne or Mars: let it be done in the Morning, after Sun-rising and while the patient is Fasting, if in the after-Noone, then after perfect digestion, the ayre being temperate.

In letting of Blood the Physitian or Chyrurgion must be carefull of his Patient, for many times, the careleſſe and unlearned, by letting of blood, openeth a way to dangerous infirmities, and oft to present death. Neither is it conuenient that a leane, and weake man or woman, or any one that is fat and groſſe, nor for a Child under Fourteene yeares of age, to be let blood. It is to be considered, how it standeth with the Patient inwardly, for his Complexion, and age, for the time of the yeare, and of the day. Therefore it is best to let blood, in faire, temperate, and Sun-shine weather.

The best times to let Blood be

For the	Sanguine	Moone in	Cancer, or Pisces.
	Choleriche		Cancer, Scorpio, or Pisces.
	Melancholie		Libra, or Aquarius.
	Phlegmatich		Aries, or Aquarius.

For the Phrenſie, Peſtilence, Squinancie, Pluriſie, Apoplexie, continuall head-ach, hot burning Feuer, or any other extreame paine or dangerous diseale, remedy muſt be sought with all conuenient speed, but then blood is not to be let in so great quantity, as if a chosen time might be taken.

Euery learned Physitian, will consider many Astrologicall obſeruations neceſſary in Blood-letting, Purging, and bathing.

Ob-

Obseruations of Husbandrie, and Gardening in euery Moneth of the Yeere.

A Skilfull, and diligent Husbandman will first looke to the nature of the ground, that hee is to till, next to the seasons of the yeare, then to the customes, and fashions of the Countrey, and place, which although some men hold as second natures, yet as it is not good for any man to be too pretudicate in his owne opinion; so let not any one be too great a slaue to other mens traditions, but to stand vpon the ground of reason, made good by experience.

Husbandry doth vary according to the nature and Clymates of Countries: for as the Earth, the Ayre, the little, or much Heate, Cold, or Moisture doth increase or diminish: so must a good Husbandman alter his seasons, labours, and instruments. In the fruitfull Vales of this Kingdome, where is stiffe clay Land, and in other places of the like nature, all tillage must bee begun, betimes in the yeare, the Plowes, and other implements, large, and strong, and the labour great and painefull. In mixt soyles, that are fruitfull, all arable workes, would begin at later seasons, the Plowes, other necessaries, and labours, are to bee somewhat lesse, than the other.

In light sandy grounds, that be fruitfull, their seasons be latest, their furnitures, and labour least.

Lastly in barren, and vnfruitfull fields, the arable toyles, would haue a fit season of the yeare (Annus fructificat, non ager,) and the Plowes, and instruments must euer bee framed according to the nature of the ground.

Ianuary.

Fœcundos Ianus calices, eſcamq́, tepentem
Poſcit: Et arcenda eſt corpore ſegnities.

IN Ianuary cut downe Timber, (and it ſhall not chinke, nor be eaten with Wormes) in the laſt quarter of the Moone. Set, or ſow kernels, and berries, of Bay trees, Prunes and Box. Set Quickſets, Roſetrees, Peaches Filbeards and Plums, and if the Froſt be not too hard, remoue Trees, ſet Rounſuall peaſe, and Beanes, rid fruit trees of ſuperfluous branches. Lop Trees, and Hedges, drench, and geld Cattell for reare. Fallow land for Wheat, and Rie. Trench Gardens with dung. The beſt time to ſet, ſow, remoue, prune or lop is before the full of the Moone, but ſow Peaſe and Beanes, and dung Land in the laſt quarter, Remoue Bees, and for your owne health keepe your body warme, let good and wholeſome diet be your Phyſitian, and rather with exerciſe, and labour, then ſawce encreaſe your appetite.

NOw ſet, and lay Quickſets, ſet and plant Vines, Oſiers and Roſetrees. Sow Peaſe, Vetches, and Beanes kernels, and Muſtardſeed. Plaſh Hedges. Caſt vp Ditches and ſet Hoppes. Prouide now to haue ſallets in Summer. Sow Oates, in cold, and ſtiffe Land. For your health take heed of cold, forbeare meates that bee ſlimie, and flegmaticke, and if need require, eyther Purge, Bath, or bleed, as Art ſhall direct you.

March.

Languet Hiems, redeunt viola, mare nauita sulcat,

Whatsoeuer Disease cannot in the Spring time be cured by Physicke, will hardly be rid all the yeare after.

Aprill.

Arboribus flores, dat pratis gramen Aprilis:
Quid cessas teneras pascere Pastor Oues.

IN Aprill sow Barly, Hempe, and Flaxe, and all kind of seeds left vnsowne the last Moneth. Pole Hops, set Garden hearbes, open your Hiues, and giue Bees free liberty, leaue to succour them with food, and let them labour for their liuing. Tanners now prouide them of Barke, and good Housewiues looke to your Dayries. Now by the direction of a learned and skilfull Physitian, bleed and purge, and they that haue Riches, or be troubled with the Gout, may goe to the Bathes in this Moneth, and the two next.

May.

Omnia nunc florent, nunc formosissimus annus:
Nil seget i duro frigore pejus erit.

NOw set, and sow all manner of fine Hearbes, and seeds, let Bulls & Boares. Take Lambs from their dams. In

Cut neyther Hedge nor Tree, during this and the 2. next Moneths. Beware of great thirſt. Vſe light, thin, and coole dyet, much exerciſe, and chaſt thoughts.

Iuly.

Sirius vrit agros; nunc eſt calidiſſimus annus,
Cum Sol Herculei terga Leonis edit.

NOw apply your Hay harueſt, for a day ſlacke may be the loſſe of many pounds, eſpecially when the Weather is vnconſtant. Pull Hempe that is ripe. Gather Garden Beanes. Get Rue, and Mozine-wood, to ſtrow vpon floores, to driue away Fleas and Moathes. Gather flowers and lay them in the ſhade till they be almoſt dry, and then Dun them a little, for feare of corrupting. Vſe a moderate dyet, and beware of great thirſt, for nothing bringeth the Peſtilence, or peſtilent diſeaſes, ſooner then extreame thirſt, and feruent heats, and cold taken ſuddainly vpon them. Beware of Phyſicke, bleed not but vpon violent occaſions.

Auguſt.

August.

Messis adest, spicas gravidas, & mitia poma

APply your Corne harueſt. Sow Winter hearbes in the new of the Moone. Gather garden Seeds. Mow Barly and Oates Gather your Summer greater fruites, as Peares, and Apples, and laſtly for your health refraine from ſleeping after meat in the day time, ſhun feaſts and banquets, and let Phyſicke alone.
